Hesam Alizadeh

626 15th Ave. Sw, Calgary, AB, T2R 0R5

Phone: +1(438)824-3509 **Email:** hesam.alizadeh@gmail.com **WebSite:** www.hesamalizadeh.com

Summary of Qualifications

- High caliber front-end developer, experienced in development of web-based systems using various front-end frameworks including Angular, Vue.js, Ember. Passionate to learn and eager to adopt most recent technologies
- Proven problem solving, communication and interpersonal skills with extensive experience in collaborative analysis, presentations (oral communication skills) and writing in professional environments
- Proficient in a variety of user research methods including in-lab usability studies, controlled laboratory experiments, field studies, individual and group interviews, and surveys
- Solid knowledge of machine learning algorithms and techniques

Computer Skills

Languages	JavaScript, TypeScript, Java, C#, Python, Matlab
Web	Angular, Vue.js, Node.js, HTML5, CSS3, Ember, Karma, Express.js
Operating Systems	Windows, Linux, Mac OS
Other	MySQL, MongoDB, Visual Studio, OpenCV, WPF, Git, Gephi, Latex

Education

2013 - Aug. 2016	M.Sc. **Human Computer Interaction**, University of Calgary, Calgary, Canada Advisors: Tony Tang, Ehud Sharlin *Thesis: Embodiments for Joint Remote Exercise*
2010 - 2013	M.Sc. **Machine Intelligence and Robotics**, University of Tehran, Tehran, Iran Advisors: Hadi Moradi, Majid Nili Ahmadabadi *Thesis: Learning from Sparse Demonstrations: An Application to Air Hockey*
2005 - 2010	B.Sc. **Software Engineering**, University of Tehran, Tehran, Iran

Professional Experience

Software Engineer **June. 2017 - Present**
SMART Technologies, Calgary, Canada

- My main focus is Lesson Activity Builder, an online education platform that is used by teachers to gamify their lessons.
- Technologies - Vue.js, Ember, Express framework, Node.js, jQuery, Html5/CSS, Guice, Jersey.

Software Engineer **Oct. 2016 - June. 2017**
Guavus, Montreal, Canada

- Part of the user interface team in which the front-end is developed in Angular and a REST WebService in Java using Spring MVC framework.

UX Research Intern **March. 2016 - Aug. 2016**
SMART Technologies, Calgary, Canada

- Responsible for iterative design and prototyping of an interactive classroom attendance taking tool

UX Research Assistant **Sept. 2013 - Aug. 2016**
University of Calgary, Calgary, Canada

- Designed a remote exercise system for seniors. Gained experience with Vicon Motion Capture System used for tracking user's body, and Node.js was used for transferring the tracking data between the remote servers.
- Used several HCI methodologies including User-Centered Design, Observational Experiment, Usability Evaluation, Ethnography, and Interviewing

Research Assistant **Sept. 2010 - Aug. 2013**
University of Tehran, Tehran, Iran

- Researched and developed a learning algorithm for a simulated air hockey playing robot in Matlab and C++ enabling the robot to learn performing accurate shots by performing few sample shots
- Designed and built a real-time air hockey playing robot in collaboration with a mechanical engineer using image processing techniques for tracking the puck movement implemented in C++ and OpenCV

Relevant Experience

Computer Supported Collaborative Work Course Project **Fall 2013**
Graduate Computer Science Course, University of Calgary

- *Haptics in Remote Collaborative Exercise Systems for Seniors*: Designed and implemented a remote arm exercise system simulating assistive pushing and pulling of the limbs using haptic feedback

Social Network Analysis Course Project **Winter 2013**
Graduate Computer Science Course, University of Tehran

- *Opinion Formation by Competing Informed Agents*: Researched and developed opinion formation strategies used by two groups of competing informed agents to shift the society's opinion toward their desired direction

Advanced Robotics Course Project **Fall 2011**
Graduate Computer Science Course, University of Tehran

- *Localization of A Mobile Robot*: Implemented the particle filter algorithm for a mobile robot in C++. The robot could localize itself in a real world map using its IR sensors

Teaching Experience

Teaching Assistant **Sept. 2013 - present**
University of Calgary, Calgary, Canada

- *Human Computer Interaction*: Taught basics of WPF programming in Visual Studio and Expression Blend, reviewed student projects and provided feedback throughout the design process
- *Introduction to Computer Science I & II*: Taught programming concepts including Object Oriented programming in Java and Python to the students, marked course assignments and exams, and provided students with step-by-step feedback throughout the design process

Teaching Assistant **Fall. 2008 - Winter 2012**
University of Tehran, Tehran, Iran

- *Social Network Analysis*: Designed and graded assignments, taught social network analysis concepts and tools including Gephi
- *Artificial Intelligence*: Taught artificial intelligence concepts, held problem solving classes, and supervised student projects submitted in Java
- *Introduction to Computer Science*: Taught programming concepts in C++ to the students and marked course assignments and exams

Publications

Volunteer Activities

VP Calgary Persian Library **2015**
University of Calgary, Calgary, Canada

- Organized several cultural events including charity events, book clubs, and poetry reading clubs

Student Volunteer **May 2014**
ACM CHI Conference 2014, Toronto, Canada

- Coordinated conference session events
